# 1. Myongji University

Since its foundation in 1948, more than 130,000 graduates have left Myongji with confidence that their knowledge and genuine consideration for others will make the world a better place. As a private university founded upon Christian faith and values, we are proud to have been a home to our graduates who are now playing significant roles inside and outside Korea in their professional fields. In year 2023, Myongji University was selected for the government grant project, initiated by the Ministry of Education and Korea Institute for Advancement of Technology, designating our university to offer training for the field of semiconductor as a leading semiconductor-specialized university.

## [Seoul Campus](#)

The Social Science Campus is located in Seodaemun district in the center of Seoul. Its proximity to the area of Shinchon, known as a university town rich in youth culture, allows students to share their energy, passion, and creative ideas in their personal growth. Students may deepen and enrich their academic and social experiences by collaborative activities with other students from nearby universities.

## [Yongin Campus](#)

The City of Yongin, where the Natural Science Campus is located, is known as the biggest of the educational cities in the metropolitan area. Known as the center for Korea's high-tech industry, Yongin has been a popular destination for the semiconductor industry, and many other high tech-related facilities, including the control center for the Mugunghwa communications satellites. It is also endowed with rich elements of cultural heritage, attracting many foreigners to experience Korean culture and traditions. Myongji University's Natural Science Campus is also easily accessible from Seoul, less than one hour by public transportation or by car.

## 2. International Students Support Services

### Office of International Affairs(OIA) in Seoul & Yongin Campus

Office of International Affairs in Seoul and Yongin campus are in charge of supporting international students with their visa process, course registration and other issues. Our staffs in the Office of International Affairs are fluent in English, Chinese, and Vietnamese languages. International students in need of any support are welcome to visit our office anytime.

### 「어우라미(OULAMI)」 (International Outreach Student Club) : Peer Support

OULAMI students are selected elite students who represent Myongji University. Their main role is to help international students adapt to their new life in Korea. They also organize weekly cultural activities for international students, such as Korean food tasting tour, visits to cultural sites, introduction of traditional Korean board games, and many more.

### 「WITH MYONGJI」 : Academic Support

'WITH MYONGJI' students are talented students with excellent academic competence who provide academic support to undergraduate international students. One 'WITH MYONGJI' student is matched with 3-4 international students, and each international student meets with his/her WITH MYONGJI students every week to receive assistance with assignments and learn Korean language.

### International Student Council

Myongji University supports activities of different international student councils, including the Chinese Student Council and Vietnamese Student Council.

### 「Hello! MYONGJI」 : Newsletter for International Students

Hello! MYONGJI is a newsletter issued by the international students to share their experiences or news related to their life in Myongji. Hello! MYONGJI is available in four different languages: Korean, English, Chinese and Vietnamese. The newsletter is issued every two months, and the work is done by international student journalists.

### Academic Counseling and Guidance Service for International Students

International students experiencing academic difficulties can meet with their academic advisors to receive support they need. Counseling can be provided in foreign languages upon request (Chinese, Vietnamese).

## 13. English Track

### ■ Global Smart Infrastructure Engineering major

Global Smart Infrastructure Engineering major encompasses three major disciplines: Civil Engineering, Environmental Engineering, and Transportation Engineering. This interdisciplinary approach ensures that our educational offerings meet the modern demands of smart cities and smart infrastructure. The program integrates various elements essential for developing futuristic smart cities, including smart construction, digitalization of infrastructure, 3D spatial information systems, carbon neutrality, smart water management, renewable energy, autonomous driving, mobility services, and smart logistics.

Our objective is to cultivate professionals who are pivotal in the construction and maintenance of infrastructure, environmental management, transportation, and logistics. These fields are crucial for building and sustaining safe, convenient, and pleasant cities. Our program focuses on nurturing engineers with a balanced and holistic approach, both academically and practically. We aim to foster well-rounded individuals who possess specialized knowledge in their respective fields and can apply creative thinking and interdisciplinary approaches to solve urban societal problems while fulfilling their social responsibilities.

In addition to the core disciplines within the department, we offer courses that incorporate cutting-edge, data-driven technologies such as AI and digital twins, fostering the development of multidisciplinary talents.

▶ Students will develop a strong foundation in the principles and practices of civil, environmental, and transportation engineering.

▶ The program also aims to develop global leaders capable of integrating new technologies such as IoT, AI, and big data to support the development of smart cities.

▶ By bridging civil, environmental, and transportation engineering, the program fosters a holistic perspective, enabling students to design and implement solutions that consider both technical and societal impacts.

▶ Graduates of this program will be well-prepared for diverse career paths in government agencies and industries focused on infrastructure development and management, environmental sustainability, and transportation planning and management, among others.

▶ This program is ideal for students who are passionate about building and maintaining well-balanced, well-planned urban systems—encompassing infrastructure, environmental, and transportation systems—to support a high quality of human life.
