01 Department of Global Convergence

A Dedicated Undergraduate Program for International Students

Department of Global Convergence at Gangneung-Wonju National University is an undergraduate program exclusively designed for international students from diverse cultural backgrounds. Our mission is to nurture convergent talents who can meet the demands of a rapidly evolving global society.

The School offers four specialized majors—Global Liberal Arts, General Engineering, Global Business, and Food Science & Marine Biotechnology. All courses are conducted entirely in English, ensuring that students develop globally competitive expertise applicable anywhere in the world. In the first year, students receive structured education in Korean language and culture to enhance their understanding of Korean society and cultivate intercultural sensitivity with integrative thinking skills.

Our curriculum is centered on fostering practical, globally competent leaders who are prepared to excel on the international stage. Department of Global Convergence will serve as a strong foundation for students to realize their aspirations and launch their global careers.

03 Majors Overview

1. Global Liberal Arts

This major explores the humanities, society, culture, economy, and politics from an international perspective. Students are encouraged to design their own academic pathways by combining knowledge from various disciplines. The program supports intellectual freedom and interdisciplinary learning, allowing students to select courses from various departments and gain a comprehensive insight across diverse fields.

2. Global Business

This major offers an integrated approach to engineering education, covering the fundamental principles and core technologies of fields such as mechanical, electrical, and chemical engineering. It focuses on cultivating problem-solving skills and creative thinking, equipping students with the ability to address diverse and complex, versatile, and innovative engineering projects.

3. General Engineering

This major aims to develop professionals capable of thriving in the dynamic global marketplace, where countries and cultures increasingly interact. Students gain a solid grounding in international business theory and learn to manage diverse economic and cultural environments to achieve successful business outcomes.

4. Food Science & Marine Biotechnology

This major integrates marine resources and biotechnology to develop talent for a sustainable marine-based food industry. The curriculum covers the physiology and characteristics of marine organisms, technology and development of marine products, and food safety. Through practical education, this empowers students to explore and harness the potential of marine resources.

Grade	Language	Curriculum
Freshman	English	Basic Studies, Basic Studies in Undergraduate Program (Basic Department Allocation)
Sophomore		
Junior		
Senior		Basic Studies, Undergraduate major course
		Undergraduate major course
